

Smart Select

An Autodesk Navisworks Manage plugin for fast selection, isolation, section-boxing, and tracking of model elements by their Revit IDs.

NAVISWORKS 2022–2026

SELECT BY REVIT ID

EXCEL / CSV

WPF DARK UI

v1.1

KEY FEATURES

Advanced Element Selection

Input, select, and highlight Revit Element IDs directly inside Navisworks models.

Bulk Import & Export

Import Excel/CSV lists of Element IDs and export verification reports of what was found or missing.

Live Update Checker

The Info window checks GitHub in the background and notifies you when a newer version is available.

Aesthetic WPF UI

Visual Studio–styled dark dialogs with premium color schemes generated on load.

CURATED RIBBON UTILITIES

Zoom to Selection Instantly center and zoom on the active selection.

Clear Isolation Restore full model visibility.

Clear Section Box Clear active clipping boxes.

License Manager Activation, license details & support card.

Isolate Selection Fast isolation of the selected elements.

Auto Section Box Fit a section box around selected items.

Save Viewpoint Save the current viewpoint.

Select By Revit ID Open the modeless ID selection window.
